

The Argonaut is an octopus with a shell. As bizarre as that sounds, in 300 B.C., Aristotle proposed that the female Argonaut used her shell as a boat and her eight arms to row it! Have no fear. Enjoying The Argonaut probably won't lead you to proposing any new theories about the natural world, but, after a long day, you might still be tempted to contemplate the animal kingdom while savoring this refreshing Sauvignon Blanc, and maybe snacking on a ring, or two, of calamari!
